

List of Plants recorded from Menorca - April 8 - 15 2000.

The localities where the plants listed below were found are identified by the following codes:-

MG - Matchani Gran	MN - Montgofre Nou
T - Tirant	CF - Cap de Favaritx
SR - Sa Roca	CFS -Track south of Cap de Favaritx
MT - Monte Toro	AG - Algendar Gorge
SB - Son Bou	NT - Naveta d'es Tudons
SBN - Track north of Son Bou marsh	C - Cuidadella
TG - Torre d'en Gaumes	CC - Cap de Cavalleria
EG - s'Albufera Es Grau	

No attempt is made to list all the localities where the commoner species were found; indeed, those plants which are really widespread, and which were therefore seen almost every day, are not given any localities. English names are only given for species which occur in the UK, or which are particularly common in Menorca. The families are arranged in the sequence used by R.D. Meikle in his definitive 'Flora of Cyprus' (1977).

Dear Sir:

I am very glad to thank you for the donation of £275 made by your association to the GOB.

Please tell the people that has participated in this donation that it will be used to preserve the environment and wildlife in our island. We feel encouraged to work harder in our task and are conscious that we are not alone.

Best wishes
